

## About GorillaCasino

The GorillaCasino team has brought together cryptocurrency enthusiasts from across the globe. Our main objective in creating this i-Gaming platform is to ensure that users will have unforgettable experiences across the whole website.

The team is interested in utilizing the full potential of blockchain development to build a larger, more lucrative, impactful, and entertaining platform for everyone in order to provide a lot of benefits, including platform scalability, low commissions, instantaneous transactions, and a wide range of token usage options.

## Activities on the platform

GorillaCasino is a crypto-oriented i-Gaming platform with a huge palette of options when it comes to blockchain technology and gambling activities. Below, you can see the activities that are possible at this crypto project:

- All types of casino games
- Sportsbetting
- E-sports
- Provably Fair games
- Multicurrency support
- Staking GOR tokens
- Passive income for all NFT holders
- Payouts in BTC, ETH, USDT, and much more
- Bonuses: Welcome Deposit Bonus, Rakeback, Cashback, Free Spins, Free Bets
- Casino tournaments
- VIP Program
- A superb customer support team that is working 24/7

## GOR token purpose (Staking, Lotteries, Voting, Games, Liquid Asset)

GOR is the internal token of GorillaCasino's platform. It is used to promote a positive gaming atmosphere and profit sharing. However, GorillaCasino doesn't stop there because its management team is convinced of the enormous potential of the GOR token.

The following are the top 6 reasons to own GOR in your portfolio:

- **Staking** - By staking GOR tokens, you will have the opportunity to generate passive income and exclusive access to our lotteries and giveaways!
- **Lottery** - We will host regular lotteries for all GOR token holders. You can win many prizes in these lotteries, such as cash, bonuses, free bets, and free spins.
- **Voting** - Each user that owns GOR tokens will have a voting right in the future endeavors of this i-Gaming crypto project. The more GOR tokens you own, the stronger

your voting right is going to be. These voting activities will mainly be happening in our DAO community.

- **House Games** - Soon, we will release games that will be playable with our GOR token. These house games will have payouts in cryptocurrencies!
- **Liquidity farming** - In Q1 2023, we plan to enable liquidity farming rewards for all GOR token liquidity providers on Uniswap.
- **Guaranteed liquidity** - By locking 20% of the max token supply to the Uniswap liquidity pool, we assure you there will be liquidity for GOR tokens at any time.

## CertiK Audit

CertiK is a protocol and smart contract audit service. In order to ensure that smart contracts and Web3 apps are 100% secure, it uses advancements in artificial intelligence and formal validation. It also monitors and analyzes the rapidly expanding field of blockchain networks.

## Multi-currency casino

We know the importance of having a variety of deposit and withdrawal options because we are a team of i-Gambling enthusiasts that want to create a better place for online gambling. So, we decided to create a casino where you can make transactions with several cryptocurrencies such as Bitcoin, Bitcoin Cash, Ethereum, Ripple, Litecoin, Solano, Binance Coin, Dogecoin, and much more.

## Ecosystem

The GOR ecosystem goes much beyond the GorillaCasino platform itself and makes it easier to engage with it. For all users and other holders, the value of GOR rises as a consequence of the increasing set of token applications and a decrease in the overall number of tokens due to the burning process.

Owners of GOR are free to decide how to use their tokens. They may use GOR to vote, trade, and farm on outside platforms, participate in games, and stake. The next sections disclose these and additional chances for readers to immerse themselves in our GOR universe fully.

## Issue

**Name:** Gorilla Token

**Ticker:** GOR

**Chain:** Ethereum (ERC-20)

**Contract address:**

<https://etherscan.io/address/0xD178724F70082a89e9b5537Aa7a3466baCB2c737>

**Total emission:** 100,000,000 GOR. This is the total supply of GOR tokens that will ever exist in this crypto ecosystem.

## Allocations

We have allocated the total GOR supply (100,000,000 GOR) to several pools. You can see the details below:

- Presale - 30,400,000 GOR (30.4%)
- Bounty Campaign - 10,000,000 GOR (10%)
- Team and advisors - 10,000,000 GOR (10%)
- Locked in liquidity pool - 21,888,000 GOR (21.888%)
- NFT Airdrop - 27,412,000 (27.412%)

## Burning

Once per week, tokens are burnt. The GorillaCasino team is in favor of further ecosystem expansion and a strong product economy. These token burns increase the value of GOR, maintain the right amount of balance between token holders and devs to enable the token distribution scheme, and steadily raise staking rewards for token owners.

There are a finite number of issued tokens (100 million GOR tokens). The worth of each GOR may increase if their quantity declines due to burning while the number of people seeking to buy platform tokens stays the same or increases. Holders of tokens benefit when the value of that token increases. This is a routine procedure for platforms that work to safeguard the rights of the token holders in their ecosystem.

## Voting

The GorillaCasino community has a significant influence on the project ecology. The choice is submitted to a vote if the GorillaCasino team is unsure which approach will best satisfy the needs of token holders.

Users that have GOR on their balance and have already begun investigating the potential of this ecosystem are eligible to vote. A user may only vote once. However, there will be a few tiers of voting power, and the more GOR tokens you own, the more influence you will have with your vote.

## Earn

By using the advantages of our exclusive platform, our users will be able to earn cryptocurrencies. Of course, you can increase your portfolio by depositing and winning from casino games and sports betting. However, you can also use the features of our casino to grow your bankroll.

## Staking

For all GOR holders, staking on GorillaCasino is a special method of multicurrency weekly drops. Users who stake have the opportunity to get daily rewards in exchange for staking GOR tokens.

### How do Staking payouts work?

Every 7 days, we will give away a percentage of the total profit. The more tokens you have staked in the weekly lottery, the more chances you will have of receiving a prize. Our vision is to provide an easy way of getting extra money for every platform user, and all that you have to do is buy GOR tokens and stake them. Each week, 100 lucky users will share the casino profits!

## NFT

We aim to launch our first NFT collection of 10,000 Gorillas in Q1, 2023. Our NFTs will have utilities from their very first day. In fact, there will be more utilities that all holders will benefit from. We are speaking of sharing casino profits, increased Rakeback, deposit bonuses, GOR token airdrop, lottery multiplier, free spins, and free bets. In the future, we will continue adding utilities for our NFT holders, so there will be more demand, which will result in an increase in their price.

## Airdrop

We are going to airdrop 27.412% of all GOR tokens (20,000,000 GOR) to the buyers of our upcoming NFT collection. By purchasing a Gorilla NFT, you will start enjoying various benefits. However, one of the most important things you will love about our collection is that one of the NFT's traits will be responsible for the amount of GOR tokens that will be airdropped to your account. The rarer the trait is, the more GOR tokens you will receive, which later can be used for staking, farming, and betting on our games.

## NFT Collection

### What are Gorilla NFTs?

Gorilla NFTs are a group of 10,000 unique Gorillas with proof of ownership on the ETH blockchain, created algorithmically utilizing over 100 attributes, with an emphasis on usability.

Gorillas cannot be changed or taken since they are indelibly imprinted onto the blockchain. Everyone can independently confirm that there are only 10,000 NFTs and that each one is unique. Since no two Gorillas are the same, they are non-fungible.

Each Gorilla is a work of digital art that also serves as a personalized VIP membership card similar to what you'd get at a land-based casino. By owning a Gorilla NFT, you can start reaping the benefits of being a GorillaCasino VIP player.

## Benefits

Each Gorilla NFT will have a unique set of 7 traits. These traits are body, mouth, hat, eyes, background, banana, and necklace). Each of these traits will give a different benefit to its holder. Below, you can find out more about the utilities we will be active from the first day of the NFT sale.

**Rakeback** - By owning a Gorilla NFT, you will be able to enjoy the benefits of increased Rakeback. For example, if Gorilla's eyes are the trait that will decide how big Rakeback you will receive, the rarer the eyes are, the bigger Rakeback you will be getting. So, as you play casino games or bet on sports, a percentage of the rake you generate will be returned to your player account as cash, with 0x wagering requirements.

**Freebets** - Another trait of our NFT collection will give you the ability to receive Freebets. The size of the Freebet will depend on the rarity of the corresponding trait. In addition, you might have to place a qualifying bet each month in order to be eligible for the Freebet. You can use your Freebets on sports and E-sports matches.

**Free Spins** - Does someone mentioned Free Spins? We know how much every online casino player loves Free Spins. That is why we decided to allocate one of the traits for the purpose of giving away thousands of Free Spins that can be used on slot games. Of course, the rarer your trait is, the more Free Spins you will get, and their value will be bigger!

**Profit Sharing** - A percentage of our casino profits are going to be shared with all NFT holders. Again, the percentage of the casino profit you will receive will depend on the number of NFTs you hold and the rarity of the trait responsible for the profit-sharing allocation.

## FAQ

### What is a \$GOR Token?

\$GOR is the utility token of the Gorilla Casinos. It is a non-mintable ERC20 token deployed on Ethereum with a fixed total supply of 100 million tokens. The tokenomic model of \$GOR is deflationary by design because we will burn a portion of the tokens on a weekly basis.

### When will be the Gorilla Casino launched?

We will launch the crypto-friendly Gorilla Casino in Q4 2022.

### Is there going to be Bounty & Airdrop campaign?

Yes. We have scheduled both Bounty and Airdrop campaigns. While the bounty campaign is intended for marketing purposes, Airdrop is going to deliver 27.412% of all tokens to the Gorilla Casino NFT holders.

## What is staking?

Thanks to staking, cryptocurrency owners now have a method to put their digital assets to use and generate passive income without selling them. So, when you stake your GOR tokens, you will be earning a portion of the casino's profits.

## When is scheduled the sale of the upcoming NFT collection?

We aim to schedule the sale of our NFT collection in late Q1 2023 or early Q2 2023. Each NFT will have a price of \$1,000, and in order to be able to mint, you will have to be whitelisted. Enter our Discord Channel to learn how to get whitelisted!

## What games can I play at Gorilla Casino?

At Gorilla Casino, you will be able to play all types of casino games: Live Casino games (Roulette, Blackjack, Baccarat), slots, table games, Jackpot games, Aviator, and much more!

Can I bet on Sports at Gorilla Casino?

Yes. You can place your sports bets on any of the many available sports! In addition, you can also bet on E-sports and virtual sports!

## Team

The GorillaCasino team has brought together cryptocurrency enthusiasts from across the globe. We all share a commitment to the development of online gaming, and we work hard to create an unforgettable experience for you.
